Elven (Mythrite)	8	21	28	35	39	42
Adamantine	9	23	30	38	42	45
		<p>Hammers and maces do short sword damage but have 20% armor penetration. Daggers have 10% armor penetration (good at exploiting gaps in the armor). Battle axes do the same damage as swords, hand-axes the same as short swords. Polearms do the same damages as great swords Exception: Poleaxes only do arming sword base damage but have 25% armor penetration. Spears would do short sword damage (but at longer range), and are not considered polearms. Generally, weapons do the same damage as the type with the same die in classic D&D. Clubs do 18 damage; Stone axes do 20 damage with mace-like armor penetration (weight and relative dullness). Long swords, great swords, battle axes, and polearms are all two handed. “Swords” refers to “arming swords” and other non-short one-handers.</p>				

Body
